Subject: Clarification on Landfill Sampling
Date: Thursday, June 16, 2022 3:40:00 PM

Hi Jon

As you may know, Jennifer and Linda have been discussing monitoring requirements for the landfill. I am writing to clarify that detection monitoring requirements presently are applicable to the landfill. Notwithstanding language to the contrary in paragraph 95, the GSA plan required by paragraph 95 of the CAFO should describe detection monitoring requirements for the landfill.

On a related note, Xcel's alternate source demonstration for the landfill presently is under review. The Agency will let you know as soon as possible after a determination is made on the ASD.

Please feel free to call with any questions.

Chuck
